The Allrounder

The tipping container is especially suitable for emptying by means of forklift trucks and also for courtyards and places which offer little space for a disposal vehicle. Tipping containers with a useful volume of up to 2,500 liters which permit such emptying are only available from IVB Umwelttechnik GmbH.

The UB 2.5 can also be retrofitted with wheel brackets and can also be used as a standard container.

Special Options

Preparation for the Retrofitting of castors

Preparation for the Retrofitting of lifting Pipes

With lifting bags Expandable
